

**MAT 135 - Business Precalculus**

- Chapter 1 – Linear Functions
  - 1.2 – Linear Functions and Applications
    - Supply and Demand, pgs. 17-29
    - Equilibrium (quantity and price), pgs. 19-20
    - Cost Analysis, pgs. 20-21
    - Break-Even Analysis, pgs. 21-22
- Key Definitions, Theorems, and Formulas
  - Compound Amount; Future Value of an Ordinary Annuity; Present Value of an Ordinary Annuity, pg. F2

**MAT 136 - Business Calculus**

- Chapter R – Functions, Graphs, and Models
  - R.1 – Graphs and Equations
    - Compound Interest; Compounded Quarterly, pg. 9
  - R.4 – Slope and Linear Functions
    - Total Cost; Fixed Cost; Variable Cost. Pg. 43
    - Profit-and-Loss Analysis; Total Revenue; Total Profit, Break-Even Value, Gain and Loss, pgs. 43-44
  - R.5 – Nonlinear Functions and Models
    - Demand Functions; Supply Functions; Equilibrium Point, pgs. 63-64
  - Summary
    - Total Profit; Total Revenue; Total Cost, Break-Even Value, Equilibrium Point, pg. 83
- Chapter 1 – Differentiation
  - 1.6 – Differentiation Techniques: The Product and Quotient Rules
    - Average Cost; Average Revenue; Average Profit, pgs. 161-162
- Chapter 2 – Applications of Differentiation
  - 2.5 – Maximum-Minimum Problems; Business and Economic Applications
    - Maximizing Area, pgs. 262-263
    - Maximizing Volume, pgs. 264-265
    - Maximizing Material (Surface Area), pgs. 265-266
    - Maximizing Revenue, pgs. 267-268
    - Maximizing Total Revenue, pgs. 268-269
    - Minimizing Inventory Costs, pgs. 269-271
  - 2.6 – Marginals and Differentials
    - Marginal Cost, Revenue, and Profit, pgs. 277-279
    - Cost and Tolerance (Differentials), pgs. 283-284
  - Summary
    - Marginal Cost, Revenue, and Profit, pg. 299
    - Differentials, pg. 300

- Chapter 3 – Exponential and Logarithmic Functions
  - 3.1 – Exponential Functions
    - Worker Efficiency, pg. 318
  - 3.2 – Logarithmic Functions
    - Advertising Model (Profit, Revenue, Cost), pgs. 332-333
  - 3.3 – Applications: Uninhibited and Limited Growth Models
    - Uninhibited Growth (Rate of Exponential Growth [Growth Rate], Doubling Time), pgs. 338-340
    - The Rule of 70, pgs. 340-341
    - Example of growth rate, doubling time, pgs. 342-343
    - Models of Limited Growth, pgs. 344-345
    - Alternative Derivation of  $e$  and  $P(t) = P_0e^{kt}$  (using compound-interest formula), pgs. 345-347
  - 3.4 – Applications: Decay
    - Present Value, pgs. 356-357
  - 3.6 – An Economics Application: Elasticity of Demand
    - Elasticity of Demand, pgs. 371-374
    - Elasticity of Revenue, pg. 374
  - Summary
    - Uninhibited Growth, pg. 379
    - Growth Rate, Doubling Time, Rule of 70, Exponential Decay, pg. 380
    - Half-Life, Decay Rate, Present Value, Elasticity of Demand, pg. 381
- Chapter 4 – Integration
  - 4.3 – Area and Definite Integrals
    - Determining Total Profit, pg. 418
- Chapter 5 – Applications of Integration
  - 5.1 – An Economics Application: Consumer Surplus and Producer Surplus
    - Demand Curve, Supply Curve, Equilibrium Point, pg. 474
    - Consumer Surplus, pgs. 474-475
    - Producer Surplus, pgs. 476-477
    - Equilibrium Point, pgs. 477-479
